This heavy rainfall in May is playing havoc with herbicides used in corn. In many cases the herbicide has washed out of the effective control area. We've seen fields and had calls about crabgrass being in abundant supply.

The choice is either to cultivate or apply an additional 2 pounds of AA trex plus one gallon of non-phytotoxic crop oil. For the oil treatment to be effective the grass should not be more than 1 1/2 inches tall.

Hog numbers are on the rise. In 1969 the estimate was 2200 head. December 1970 the number was 3700.

There's good money in feeder pigs at current prices. What better way is there to use corn and barley?

Samuel Martin is working with us on a test - demonstration using a pre-plant application of 15% Di-Syston. This material does a good job in controlling Mexican Bean Beatles and thrips.

It's like taking out a fire insurance policy - you may need it and then again you may not.

* * *

Speaking of Di-Syston I'm told that some farmers are planning to use the liquid formulation. We are not recommending the liquid. Reason, Di-Syston is a very hot pesticide and in the liquid form it's more concentrated, thus more dangerous. One drop of the concentrate on the skin will pass right through much like a pin.

Di-Syston granules are a 15% formulation and quite safe to use when handled properly.

* * *

James Clark and Paul Ford will be using Tillam as a herbicide on a portion of their tomato crop. This is a test - demonstration material that has looked good elsewhere in Virginia. They are planning for a two acre crop - which is the largest tomato venture in the county.

* * *

Today (Thursday) a number of Appomattox farmers will be attending the Virginia Crop Improvement Field Day in Amelia. Here they will see some of the newest varieties of small grains

If you failed to vaccinate your horses last year against VEE be sure to have your vet do it now.

There are two other diseases that horse owners should also guard against (EEE) Eastern Equine Encephalitis and (WEE) Western Equine Encephalitis. Horses should be vaccinated for the later two diseases every year.

We are finding army worms in No-Till corn. Better check yours. Sevin does the job at 2 pounds 50% W P per acre.

The cemetery is located in Appomattox Court House National Historical Park. Congressional Representative Watkins M. Abbitt (nearest monument on left) recalled that both of his grandfathers were Confederate soldiers, that one was with Lee at Appomattox. In his address Sunday he graced the background of Virginia's many contributions to the nation and stated that the Confederate monument was being dedicated "in memory of great heroes."
